3.5 Cider Solar – Final Resolution - Hecate Energy Cider Solar LLC is proposing to construct a utility scale solar farm project at various properties in the towns of Elba and Oakfield.

The project will be located on 2,455 acres and utilize solar panels mounted on tracking panel racks to convert the sun's energy into 500 MW of AC power and will be interconnected with the electric grid.

The project will provide enhanced property tax-type payments to the host municipalities through 30-year PILOT and Host Community Agreements that will contribute fiscally at a significantly greater level ($35.23 million PILOT payments, $38.35 million Host Community Agreement Payments) than the current agricultural-vacant land property tax payments generated by the project's properties.

This project has an estimated $87.9 million fiscal economic impact (PILOT payments, Host Community Agreement payments, fire district payments, elimination of ag-exemptions on acreage used for solar panels, and Residential Utility Bill Credits) and results in an estimated return of $23 in economic impacts vs the tax impacts of the land's prior use.

The total capital investment of the project is approximately $550M. The company will receive approximately $44M in sales tax exemption, $5.5M in mortgage tax exemption and $82M in property tax exemption.

A public hearing was held on November 28, 2022 in the Town of Elba and the Town of Oakfield. Both public hearings were well attended by the town officials from Elba and Oakfield, however we received only two comments. The comments we received were both clarifying questions - one asked if the payment schedules to the schools would continue if the school districts merged in the future, and another asked how the local labor policy reporting is undertaken.

4.8 Greater Rochester Enterprise Contract – Greater Rochester Enterprise (GRE) is our non-profit regional economic development organization supported by a team of private and public-sector leaders in the Finger Lakes Region to grow the economy in Genesee County and our eastern neighbors.

This funding request supports GRE staff partnerships with the GCEDC’s business development, sales, and marketing efforts, site development, and talent attraction efforts. The GCEDC also receives an active role on Greater Rochester Enterprise’s board of directors.

GRE staff directly enhance the GCEDC’s active sales funnel at STAMP and our shovel-ready sites. Notably, GRE has provided critical regional connections that further company due diligence, including work that lead to Edwards Vacuum’s $319 million, 600-job project announced in November.

Included with the meeting materials was a memo from GRE President and CEO Matt Hurlburt for a full report of his organization’s support to the GCEDC.

Fund Commitment: An investment renewal of $52,000 for continued marketing and business development support for one year. This is an increase of $2,000 over last year’s commitment.

This was recommended for approval by the Committee.

M. Clattenburg made a motion to approve the 2023 Greater Rochester Enterprise Contract, not to exceed $52,000; the motion was seconded by M. Gray. Roll call resulted as follows:

This agreement is between Sheila Eigenbrod, retired Pavilion High School Principal / current Interim Principal, and the GCEDC. This is the same agreement that was used for John Jakubowski. Services to be provided by Sheila Eigenbrod include the following:

1. Perform consulting services to assist in the development and implementation of workforce development programs and training initiatives relative to the goals of the Company and its affiliates.
2. Consult with the VP of Business Development of the GCEDC and staff relative to the application, development and deployment of its workforce programs.
3. Consult with educational institutions who may serve as partners in the development, implementation and delivery of training programs. Specifically, interface with Genesee Community College and its BEST Center, other institutions of higher learning, the Genesee Valley Educational Partnership and local secondary schools as appropriate.
4. Provide consulting services as requested by the GCEDC / GGLDC.

This contract is not to exceed $29,800 and was included in the 2023 GCEDC budget. The County increased their funding amount in 2022 by $25,000 to support administration of a workforce development program. These funds will be used for this contract.

6.1 NYISO Deposit Increase from $5,000 to $10,000 – In 2017 the GCEDC applied to the NYISO with an interconnection request to draw down 500 MW from the 345 kV lines to the north of the STAMP site. Upon completion of the Systems Impact Study (SIS) and the facility study, the NYISO determined that the GCEDC could draw down 300 MW without having to pay for any improvement to the overall electrical grid. Upon conversations with NYPA, if the GCEDC would like to draw down 600 MW we need to submit another interconnection request to get in the interconnection queue. This is a four-step process:

Step 1: The GCEDC submits an interconnection request. The project description is to increase the load at the STAMP location. NYPA believes that there is a deposit required of $5,000.

Step 2: NYISO holds a meeting with all affected parties to confirm the request as well as to discuss the scope.

Step 3: System Impact Reliability Study. NYISO performs this study and provides recommendations for any needed upgrade.

Step 4: Facility Study: The transmission Owner develops detailed scope and cost estimate for the scope. After this point, the project can be considered firm if you decide to move forward.

Potential future costs: The total cost of the SRS may be between $30,000 to $100,000, depending on the scope. They require a $150,000 deposit but you pay the actual study cost.

Fund Commitment: $10,000 to be covered under the $8 million grant. The Board previously approved up to $5,000.

This was recommended for approval by the Committee.

P. Zeliff made a motion to approve the interconnection request to NYISO and to increase the deposit from $5,000 to a not to exceed amount of $10,000 as presented; the motion was seconded by C. Yunker. Roll call resulted as follows:

6.2 CPL Final Design & Bid Packet for WWTF Contract – The GCEDC is currently looking at sizing the WWTF appropriately for the current tenants locating at STAMP. The GCEDC had previously worked with the DEC for the better part of a year and half to get the 1 MGD plant approved. We are still awaiting final
DEC comments on that design. We need to look at options and flows for construction since we have tenant commitments that would require the construction of the WWTF. CPL recommends to design and permit a 150,000 GPD Onsite SBR WWTF base project that will be expandable at treatment capacity levels of 150,000, 300,000 and 450,000 GPD. The upstream and downstream infrastructure will be designed to accommodate a full build out capacity of 450,000 GPD. A low flow 25,000 GPD treatment option will be included for budgetary flexibility. The phased solution will provide significant bidding flexibility to right size the WWTF to meet STAMP’s operational needs and budget.

**Fund Commitment**: Not to exceed $225,000 to be covered under the $33 million grant.

This was recommended for approval by the Committee.

P. Zeliff made a motion to approve the CPL contract for the final design and engineering of the WWTF not to exceed $225,000 as presented; the motion was seconded by M. Gray. Roll call resulted as follows:

**6.3 STAMP Maintenance of Common Space Areas** – We have been working with Phillips Lytle on the best structure to ensure that the common areas are maintained at the STAMP site. Phillips Lytle has prepared a memo, included with the meeting materials, outlining our findings and conclusions. Staff believes that the best option is for the GCEDC to transfer the undevelopable land at STAMP to an existing 501(c)(3), such as NY Green, of which the GCEDC maintains a Board position. The GCEDC would not transfer the protected areas to NY Green, however. STAMP tenants, as part of the business park association, would be charged a common area fee based on the developable acreage at the STAMP site that would be paid to NY Green. In turn, NY Green would be responsible for the contractible obligations for mowing, etc. of common areas at the STAMP site.

**Fund Commitment**: None.

This was recommended for approval by the Committee.

P. Zeliff made a motion to approve the form and function of the maintenance of the common areas as outlined above; the motion was seconded by P. Battaglia. Roll call resulted as follows:

**6.4 Access License Agreement for Edwards Vacuum and/or affiliates for due diligence work** - Phillips Lytle has prepared for the GCEDC an Access License Agreement to allow Edwards Vacuum and
their agents to enable their due diligence on GCEDC owned property for their proposed manufacturing facility until that work is complete or a Purchase and Sale Agreement is executed. Any contractors would be required to sign indemnity agreements, provide proof of insurance and list the GCEDC as an additional insured on their policy with the applicable coverage limits as set forth by the GCEDC.

**Fund Commitment:** None.

This was recommended for approval by the Committee.

6.5 CPL Proposal for SEQR Preparation for Infrastructure at STAMP - The GCEDC is currently preparing to complete a SEQR review of a couple of projects that are looking at the STAMP site. As a part of this review, the GCEDC has decided to include as much of the short-term and long-term infrastructure that is being contemplated at STAMP. This will enable less delays in permitting in the future when this infrastructure becomes necessary. To ensure that the SEQR analysis takes a hard look at the potential environmental impacts of this infrastructure, there is some design and engineering that needs to be completed. Clark Patterson Lee has prepared a proposal to reflect that work to support the SEQR analysis.

**Fund Commitment:** Not to exceed $25,000 to be covered under the $33 million grant.

This was recommended for approval by the Committee.

P. Zeliff made a motion to approve the CPL proposal for SEQR preparation for infrastructure at STAMP not to exceed $25,000.00 as presented; the motion was seconded by M. Clattenburg. Roll call resulted as follows:

STATEMENT OF COMPLIANCE OF PROJECT CRITERIA LISTED IN UNIFORM TAX EXEMPTION POLICY (UTEP)

PROJECT DESCRIPTION:

RPNY Solar 6, LLC is proposing to construct a community solar farm project on Alexander Road in the Town of Batavia. The project will utilize 8,346 solar panels and 24 string inverters on approximately 17 of 29 acres on the property to convert the sun’s energy into 3 MW of AC power. The project will utilize single axis tracking technology to allow the modules to efficiently track the sun throughout the day to maximize the efficiency of solar collection.

The project will provide enhanced property tax payments via a 15-year PILOT that are significantly greater than the current agricultural-vacant land value of the project.

The project's PILOT will contribute $4,000/MWAC + a 2% annual escalator in payments to the Genesee County and Alexander Central School District in addition to revenue in a separate host benefit agreement with the town of Batavia. The PILOT is estimated to generate $207,521 in PILOT payments over the 15-year term. The project will also fund a community benefit agreement for workforce development and economic development projects in Genesee County.

The project is aligned with New York's aggressive goals for renewable energy, energy efficiency and greenhouse gas reductions, and will offer customers a 10% discount vs average market rates for the generated power.

Criteria #1 – The Project pledges to create and/or retain quality, good paying jobs in Genesee County.

Project Name: Hecate Energy Cider Solar LLC

Board Meeting Date: December 1, 2022

STATEMENT OF COMPLIANCE OF PROJECT CRITERIA LISTED IN UNIFORM TAX EXEMPTION POLICY (UTEPC)

PROJECT DESCRIPTION:

Hecate Energy Cider Solar LLC is proposing to construct a utility scale solar farm project at various properties in the towns of Elba and Oakfield.

The $550 million project will be located on 2,455 acres. The project will utilize solar panels mounted on tracking panel racks to convert the sun’s energy into 500 MW of AC power, and will be interconnected with the electric grid.

The company is requesting assistance from the GCEDC with a property tax abatement estimated at $92,091,309, a sales tax exemption estimated at $44,000,000, and a mortgage tax exemption estimated at $5,500,000.

Criteria #1 — The Project pledges to create and/or retain quality, good paying jobs in Genesee County.

Project details: In addition to requiring a significant construction workforce, the project estimates that operation and maintenance will create approximately 9 FTE jobs with an average annual compensation of approximately $60,000. These jobs will be through direct employment by the project or through operations and maintenance contractors.

Board Discussion: None.

Criteria #2 - Completion of the Project will enhance the long-term tax base and/or make a significant capital investment.
Project details: The project will provide enhanced property tax-type payments to the host municipalities through 30-year PILOT and Host Community Agreements that will contribute fiscally at a significantly greater level ($35.23 million PILOT payments, $38.35 Host Community Agreement Payments) than the current agricultural-vacant land property tax payments generated by the project's properties.

This calculation will include the estimated value of any tax exemptions to be provided along with the estimated additional sources of revenue for municipalities and school districts that the proposed project may provide.

Project details: The project has an estimated $87.9 million fiscal impact (PILOT payments, Host Community Agreement payments, fire district payments, elimination of ag-exemptions on acreage used for solar panels, and Residential Utility Bill Credits). This results in an estimated return of $22 in fiscal impacts vs $1 of existing fiscal impacts from the land’s prior use.

4.0 Audit & Finance Committee

4.1 Insurance Renewal - J. Teresi from Tompkins Insurance attended the Audit and Finance Committee meeting to discuss the proposal for general liability insurance for 2023 from Selective. As requested by the Board of Directors, Tompkins "shopped insurance". Tompkins aggressively went after two municipal markets; however, because we are a quasi-governmental agency, they do not want to cover our entities. Additionally, per J. Teresi many carriers are not in the business of covering land development.

Historically, Selective has only charged for the exposure associated with the MedTech Centre building and has not charged for other development efforts. Last year, the insurance premium was approximately $40,000. However, with the development of the STAMP site there is an expectation that infrastructure development efforts will only increase and a change in land classification has been made. Vacant land is approximately $3/acre while land under development is approximately $20/acre. Selective has provided a quote that is reflective this change and increased risk exposure. This year, the insurance premium across all entities, including the STAMP Water and Sewer Works Corps, is approximately $71,000. This does not include the $10 million umbrella. Despite this increase, Selective is still the only and best option. The pricing included in the proposal disbursed today and presented is fairly accurate. J. Teresi is working with Selective to clean up the charges, exposures and acreage listed. He is also working to put together an alternative umbrella program. He hopes to have this pricing by next week.

C. Yunker stated that he is a Corporate Director of Tompkins and to avoid the appearance of any conflict he recused himself. He left the meeting at 4:51 p.m.

This was recommended for approval by the Committee.

T. Bender made a motion to move forward with the 2023 insurance renewal with Selective; the motion was seconded by M. Clattenburg. Roll call resulted as follows:

6.1 STAMP Force Main Easements – In conjunction with the installation of the force main from the STAMP site to the direct discharge point at Oak Orchard Creek, there are several easements needed. We have received an offer from the owner of the property (Judith Clonan-Smith) where the outfall location of the force main will be installed. They are looking for $20,000 for the three easements that we are requesting. These easements are different than the previous ones. The main easement needed goes from the roadside through the middle of their property to the creek.

7.0 Employment & Compensation – T. Bender

7.1 Administrative Guidelines – A red-line version of the Administrative Guidelines and Procedures was included with the meeting materials. L. Farrell provided an overview of the proposed changes:

- An employee may take up to five days of sick leave in the event of the death of a family member. Sick leave may be used as bereavement leave in the event of the death of a non-family member if approved by the employee’s direct supervisor.

- The Center provides health, dental and vision plans for its permanent full-time employees. The Center currently pays 100% of the subscriber-only premium for permanent full-time employees. Employees will be responsible for any premium costs for higher levels of coverage.

M. Gray asked if the guidelines were reviewed by legal counsel. L. Farrell stated that they had not been reviewed by counsel. M. Gray stated that there have been many changes within the last two years related to leave benefits. He stated that it may not be permissible for the employer to require the employee to provide the reason for leave. L. Farrell will work with counsel regarding this question and report back to the Board if any changes are needed.

This was recommended for approval by the Committee.

### Opportunity Summary:

NY CDG Genesee 4, LLC is proposing to construct a community solar farm project on Shepard Road in the Town of Pavilion. The solar project will be located on approximately 31 of 39 acres on the property to convert the sun’s energy into 4.275 MW of AC power.

The project will provide enhanced property tax payments via a 15-year PILOT that are significantly greater than the current agricultural-vacant land value of the project.

The project’s PILOT will contribute $6,000/MWAC + a 2% annual escalator in payments to Genesee County, the Town of Pavilion and the Pavilion School District. The project will also fund a community benefit agreement for workforce development and economic development projects in Genesee County.

The project is aligned with New York’s aggressive goals for renewable energy, energy efficiency and greenhouse gas reductions, and will offer customers a 10% discount vs average market rates for the generated power.

### Economic Impact:

The 4.275 MW solar farm will generate $491,811 in PILOT payments and real property taxes over the 15-year term, which is far greater than the current assessed value of this ag/vacant land. This calculates to a rate of return based on the original property taxes of $7.1 to 1.

Project details: N/A

Board Discussion:

Board Concurrence: YES NO If no, state justification:

Criteria #2- Completion of the Project will enhance the long-term tax base and/or make a significant capital investment.

Project details: The project will enhance long term tax base with a planned new community solar farm and $6,438,798 in capital investment. A fixed 15-year pilot with a 2% annual escalator priced at $6,000/MWAC is proposed which is above the top end of the NYSERDA recommended range for projects located in National Grid territory in Western NY. The 4.275 MW solar farm will generate in excess of $443,576 in PILOT payments over the 15-year term which is far greater than current assessed value of this Ag/Vacant land.

Board Discussion:

Board Concurrence: YES NO If no, state justification:

Criteria #3- The Project will contribute towards creating a “livable community” by providing a valuable product or service that is underserved in Genesee County.
Project details: The company is assisting with a $25,000 payment for STEM oriented workforce training/county economic development programming to support STEM 2 STAMP workforce development programs/local economic development programming. Residents will be offered a 10% discount to average local market rates for solar energy.

Board Discussion:

Board Concurrence: YES  NO  If no, state justification:

NOW, THEREFORE, BE IT RESOLVED BY THE MEMBERS OF THE GENESEE COUNTY INDUSTRIAL DEVELOPMENT AGENCY D/B/A GENESEE COUNTY ECONOMIC DEVELOPMENT CENTER AS FOLLOWS:

Section 1. The Company has presented an Application in a form acceptable to the Agency. Based upon the representations made by the Company to the Agency in the Application, the Agency hereby finds and determines that:

(A) By virtue of the Act, the Agency has been vested with all powers necessary and convenient to carry out and effectuate the purposes and provisions of the Act and to exercise all powers granted to it under the Act; and

(B) It is desirable and in the public interest for the Agency to appoint the Company as its agent for purposes of acquiring, constructing and equipping the Project. No such appointment shall become effective until the execution and delivery of the Project Agreement; and

(C) The Agency has the authority to take the actions contemplated herein under the Act; and

(D) The action to be taken by the Agency will induce the Company to develop the Project, thereby increasing employment opportunities in Genesee County, New York and otherwise furthering the purposes of the Agency as set forth in the Act; and

(E) The Project will not result in the removal of a facility or commercial, industrial, or manufacturing plant of the Company or any other proposed occupant of the Project from one area of the State to another area of the State or result in the abandonment of one or more plants or facilities of the Company or any other proposed occupant of the Project located within the State; and the Agency hereby finds that, based on the Application, to the extent occupants are relocating from one plant or facility to another, the Project is reasonably necessary to discourage the Project occupants from removing such other plant or facility to a location outside the State.
and/or is reasonably necessary to preserve the competitive position of the Project occupants in their respective industries; and

(F) The Town of Pavilion Planning Board (the "Planning Board") has conducted a review of the Project pursuant to Article 8 of the Environmental Conservation Law and 6 N.Y.C.R.R. Part 617 (collectively referred to as "SEQRA"). In addition to classifying the Project as a "Type I" action pursuant to SEQRA, the Planning Board issued a Negative Declaration on May 25, 2022 (the "Negative Declaration"), determining that the Project does not pose a potential significant adverse environmental impact. The Agency, having reviewed the materials presented by the Company, including, but not limited to, the Full Environmental Assessment Form and the Negative Declaration, further determines that the Project does not pose a potential significant adverse environmental impact and thus ratifies the Negative Declaration previously issued by the Planning Board pursuant to 6 N.Y.C.R.R. Part 617.7. A copy of the Negative Declaration issued by the Planning Board is attached hereto as Exhibit B; and

(G) The Agency's consent and approval of the prospective Assignment is subject to payment by the Company of all costs and fees of the Agency in connection with its review, consideration and authorization of the prospective Assignment.

Section 2. The Public Hearing held by the Agency on Wednesday, January 4, 2023, at 3:30 p.m., concerning the Project and the Financial Assistance was duly held in accordance with the Act, including but not limited to the giving of at least ten (10) days published notice of the Public Hearing (such notice also provided to the Chief Executive Officer of each affected tax jurisdiction), affording interested parties a reasonable opportunity, both orally and in writing, to present their views with respect to the Project.

Section 3. The Agency is hereby authorized to provide to the Company the Financial Assistance in the form of (a) a sales and use tax exemption for purchases and rentals related to the acquisition, construction, reconstruction, renovation and equipping of the Project, (b) a partial real property tax abatement structured through the Tax Agreement and (c) a mortgage recording tax exemption as authorized by the laws of the State.

Section 4. Based upon representations and warranties made by the Company in the Application, the Agency hereby authorizes and approves the Company, as its agent, to make purchases of goods and services relating to the Project, that would otherwise be subject to State and local sales and use tax in an amount up to $6,438,798.00, which result in State and local sales and use tax exemption benefits ("Sales and Use Tax Exemption Benefits") not to exceed $515,104.00. The Agency agrees to consider any requests by the Company for an increase to the amount of Sales and Use Tax Exemption Benefits authorized by the Agency upon being provided with appropriate documentation detailing the additional purchases of property or services.

Section 5. Pursuant to Section 875(3) of the Act, the Agency may recover or recapture from the Company, its agents, consultants, subcontractors, or any other party authorized to make purchases for the benefit of the Project, any Sales and Use Tax Exemption Benefits taken or purported to be taken by the Company, its agents, consultants, subcontractors,
or any other party authorized to make purchases for the benefit of the Project, if it is determined that: (i) the Company, its agents, consultants, subcontractors, or any other party authorized to make purchases for the benefit of the Project, is not entitled to the Sales and Use Tax Exemption Benefits; (ii) the Sales and Use Tax Exemption Benefits are in excess of the amounts authorized to be taken by the Company, its agents, consultants, subcontractors, or any other party authorized to make purchases for the benefit of the Project; (iii) the Sales and Use Tax Exemption Benefits are for property or services not authorized by the Agency as part of the Project; or (iv) the Sales and Use Tax Exemption Benefits are taken in cases where the Company, its agents, consultants, subcontractors, or any other party authorized to make purchases for the benefit of the Project, fails to comply with a material term or condition to use property or services in the manner approved by the Agency in connection with the Project. As a condition precedent of receiving Sales and Use Tax Exemption Benefits, the Company, its agents, consultants, subcontractors, or any other party authorized to make purchases for the benefit of the Project, shall (i) cooperate with the Agency in its efforts to recover or recapture any Sales and Use Tax Exemption Benefits, and (ii) promptly pay over any such amounts to the Agency that the Agency demands.

Section 6. Subject to the Company executing the Project Agreement and the delivery to the Agency of a binder, certificate or other evidence of liability insurance policy for the Project satisfactory to the Agency, the Agency hereby authorizes the Company to proceed with the acquisition, construction and equipping of the Project and hereby appoints the Company as the true and lawful agent of the Agency: (i) to acquire, reconstruct, renovate and equip the Project; (ii) to make, execute, acknowledge and deliver any contracts, orders, receipts, writings and instructions, as the stated agent for the Agency with the authority to delegate such agency, in whole or in part, to agents, subagents, contractors, and subcontractors of such agents and subagents and to such other parties as the Company chooses; and (iii) in general, to do all things which may be requisite or proper for completing the Project, all with the same powers and the same validity that the Agency could do if acting in its own behalf; provided, however, the Project Agreement shall expire on December 31, 2024 (unless extended for good cause by the President/CEO of the Agency) if the Lease Agreement, the Leaseback Agreement and the Tax Agreement contemplated have not been executed and delivered.

Section 7. The President/CEO, Chair, Vice Chair and/or Senior Vice President of Operations of the Agency are hereby authorized, on behalf of the Agency, to negotiate and enter into (A) the Project Agreement, (B) the Lease Agreement, pursuant to which the Company leases the Project to the Agency, (C) the related Leaseback Agreement, pursuant to which the Agency leases its interest in the Project back to the Company, and (D) the Tax Agreement; provided, however, (i) the rental payments under the Leaseback Agreement include payments of all costs incurred by the Agency arising out of or related to the Project and indemnification of the Agency by the Company for actions taken by the Company and/or claims arising out of or related to the Project and (ii) the terms of the Tax Agreement are consistent with the Agency's Uniform Tax Exemption Policy or the procedures for deviation have been complied with.

Section 8. The President/CEO, Chair, Vice Chair and/or Senior Vice President of Operations of the Agency are hereby authorized, on behalf of the Agency, to execute, deliver and record the Mortgage securing an aggregate principal amount of up to a maximum principal amount not to exceed $2,060,415.00, and any security agreement, UCC-1 Financing Statements
and all documents reasonably contemplated by these resolutions or required by any lender identified by the Company (the "Lender") to assist with the undertaking of the Project, the acquisition of the Facility and/or the finance or re-finance the Facility or equipment and other personal property and related transactional costs (hereinafter, with the Project Agreement, Lease Agreement, Leaseback Agreement, Tax Agreement and the Mortgage, collectively called the "Agency Documents"); and, where appropriate, the Secretary or Assistant Secretary of the Agency is hereby authorized to affix the seal of the Agency to the Agency Documents and to attest the same, all with such changes, variations, omissions and insertions as the President/CEO, Chair, Vice Chair and/or Senior Vice President of Operations of the Agency shall approve, the execution thereof by the President/CEO, Chair, Vice Chair and/or Senior Vice President of Operations of the Agency to constitute conclusive evidence of such approval; provided in all events recourse against the Agency is limited to the Agency's interest in the Project.

<td>The proposed Project involves the construction of an approximately 4.275-Megawatt (MWAC) solar facility in a fallow agricultural field located at 6464 Shepard Road in the Town of Pavilion (see Project Location Map). The Project Boundary is approximately 31.03-acres of a 39.8-acre parcel (parcel ID# 15-1-38.11). The facility will include one (1) porous gravel access road, ground-mounted solar photovoltaic (PV) arrays a perimeter fence, and an equipment pad for inverters/transformers. PV panels will be mounted on racking systems that will be pile-driven into the ground and then the solar facilities will be connected to the National Grid electric grid. Existing roads will also be utilized to access the site. No cutting of trees is proposed for this project. Landscaping with proposed trees/shrubs will be installed in the northeast portion of the Project to reduce the view of panels from the adjacent residences and public roads. The 31.03-acres Project Boundary includes all of the ancillary features such as the panel/array area, the fenced area, the access road, vegetative buffer/landscaping area, and work areas. However, the solar array area which includes the panel fence area and panel/array area is only 19.6-acres of that. This is under the Town zoning limit of 20.0-acres and so the Project would not need a variance.</td>

C. PLANNING AND ZONING

C.2. Adopted Land Use Plans
C.2.a. Comprehensive Plan
The Town of Pavilion adopted a new Comprehensive Plan in 2017, to address the long-range future of the community. According to the Zoning Map, the land use for this parcel is classified as Rural Agricultural. This Plan anticipates maintaining current levels of farming activity, support agricultural related businesses, and preserve open space and farmland throughout the Town. Additionally, as indicated in the Energy Section of the Plan, the Town encourages clean energy through the development of solar panels and wind technology. The Plan supports residents to install personal solar panels for personal use, and to take advantage of the is unique way of attaining clean energy.

Additionally, the Town of Pavilion has developed a specific Solar Policy. According to the Solar Policy, solar farms and solar energy systems may be allowed in Agricultural Residential 1 Zones with the issuance of a Special Use Permit. As mentioned previously the Project site is located within an Agricultural Residential 1 Zone, indicating that with an approval of a Special Use Permit, solar energy systems shall be allowed.

C.3. Zoning
C.3.c. Zoning Variance
The parcel is zoned as Agricultural Residential 1 (AR-1). The proposed development is a permitted use pursuant to the Town’s issuance of a Special Use Permit based on Town Solar Policy. No zoning variances or changes are anticipated to be needed.

The 31.03-acres Project Boundary includes all of the ancillary features such as the panel/array area, the fenced area, the access road, vegetative buffer/landscaping area, and work areas. However, the solar array area which includes the panel the fence area and panel/array area is only 19.6-acres of that. This is under the Town zoning limit of 20.0-acres and so the Project would not need a variance.

D. PROJECT DETAILS

D.1. Proposed and Potential Development
D.1.g. New Non-residential Construction
The Project includes the construction of electrical equipment housed on either concrete pads or mounted on posts. These contain electrical components necessary to process the electricity generated from the solar panels. There are no buildings proposed that are intended for human entry.

D.2. Project Operations
D.2.f. Air emissions and associated permits
The proposed action will involve the use of mobile construction equipment and vehicles that will emit a small amount of air pollutants during construction. Any potential air quality impacts will be de minimis and localized to the area of construction equipment. Construction equipment will use ultra-low sulfur diesel and, where practicable, diesel exhaust filters will be utilized. Once the Project has been completed, there
will not be additional air emissions. Due to the nature of construction, a NY State Air Registration, Air Facility Permit, or Federal Clean Air Act Title IV or Title V Permit will not be required.

D.2.m. Noise
The proposed action will include the creation of noise or noise sources during construction. Noise sources are expected to be generated from construction equipment and vehicles during the weekdays Monday through Saturday, 7am – 7pm, as needed. Due to the temporary nature of the proposed action, noise barriers or screens are not practical. Existing trees around the edge of the property will remain to the best extent practicable to act as a noise and visual barrier.

E.1. Land Uses on and Surrounding the Project Site
E.2. Natural Resources on or Near Project Site
E.2.a-f Bedrock, soils, water table, drainage, and slopes

**Totals for Area of Interest**: 31.03 100.00%

Note: these are the soils within the Project Boundary area.
E.2.h. Surface Water Features
Based on a review of the NYSDEC Environmental Resource Mapper there are no NYSDEC mapped wetlands and streams on the project parcel. There are two (2) USFWS National Wetland Inventory (NWI) wetlands mapped within the parcel (see Figure 4 attached). According to aerial image review and a field delineation conducted in September 2021 there is one (1) wetland and one (1) waterbody (pond) located on the parcel. None of the identified aquatic resources fall under NYSDEC jurisdiction. There are no recorded NYS water quality impaired waterbodies on or within the vicinity of the Project parcel.

Even though, one wetland and one pond were delineated during the field survey on the parcel, the site plans show that the project boundary is excluding these areas thus there are no wetland nor streams within the project boundary. According to the Site Plans, there will be no impacts to the wetlands or streams.

E.2.m. Predominant wildlife species
Wildlife species likely to occur within the Project include common mammals, amphibians, and birds found in forested and rural settings including eastern chipmunk (Tamias striatus), eastern cottontail (Sylvilagus floridanus), eastern gray squirrel (Sciurus carolinensis), northern raccoon (Procyon lotor), striped skunk (Mephitis mephitis), white-tailed deer (Odocoileus virginianus), woodchuck (Marmota monax), American toad (Bufo americanus), green frog (Rana clamitans), American crow (Corvus brachyrhynchos), American kestrel (Falco sparverius), American robin (Turdus migratorius), barn swallow (Hirundo rustica), blue jay (Cyanocitta cristata), Canada goose (Branta canadensis), downy woodpecker (Picoides pubescens), eastern bluebird (Sialia sialis), field sparrow (Spizella pusilla), northern cardinal (Cardinalis cardinalis), red-tailed hawk (Buteo jamaicensis), turkey vulture (Cathartes aura), and wild turkey (Meleagris gallopavo).

E.2.n. Significant Natural Community
According to NYSDEC Environmental Resource Mapper there are no significant natural communities on or in the vicinity of the Project Boundary.

E.2.o-p. Endangered, Threatened and Rare Plants and Animals
According to NYSDEC Environmental Resource Mapper there are no New York State rare or species of concern plants or animals in the vicinity of the Project Boundary.

According to a review of the USFWS Information for Planning and Consultation (IPaC) on January 21, 2022, there is one (1) federally and state listed threatened species, the Northern Long-eared Bat (NLEB) (Myotis septentrionalis) in the vicinity of the Project Boundary. However, this species did not come up on the NYSDEC Environmental Resource Mapper review. Additionally, according to NY Natural Heritage Program there are no known summer or winter occurrences of NLEB within the Town of Pavilion. It is unlikely that this Project will impact this species since there is no cutting of trees proposed. Additionally, the Monarch Butterfly (Danaus plexippus) is noted on the USFWS IPaC report, however this is a candidate species and not yet listed or proposed for listing, thus consultation with USFWS under Section 7 of the Endangered Species Act is not required.
E.3. Designated Public Resources on or Near Project Site
E.3.b Agricultural lands consisting of highly productive soil.

According to the USDA NRCS Soil Survey Geographic (SSURGO) Database, the Project Boundary consists of 31.00 +/- acres (99.9%) of land with highly productive soils. These soils include farmland classifications of "all areas are prime farmland", "farmland of statewide importance", and "prime farmland if drained". An agricultural Data Statement has been completed for the Project.

Subject: List of threatened and endangered species that may occur in your proposed project location or may be affected by your proposed project

To Whom It May Concern:

The enclosed species list identifies threatened, endangered, proposed and candidate species, as well as proposed and final designated critical habitat, that may occur within the boundary of your proposed project and/or may be affected by your proposed project. The species list fulfills the requirements of the U.S. Fish and Wildlife Service (Service) under section 7(c) of the Endangered Species Act (ESA) of 1973, as amended (16 U.S.C. 1531 et seq.). This list can also be used to determine whether listed species may be present for projects without federal agency involvement. New information based on updated surveys, changes in the abundance and distribution of species, changed habitat conditions, or other factors could change this list.

Please feel free to contact us if you need more current information or assistance regarding the potential impacts to federally proposed, listed, and candidate species and federally designated and proposed critical habitat. Please note that under 50 CFR 402.12(e) of the regulations implementing section 7 of the ESA, the accuracy of this species list should be verified after 90 days. This verification can be completed formally or informally as desired. The Service recommends that verification be completed by visiting the ECOS-IPaC site at regular intervals during project planning and implementation for updates to species lists and information. An updated list may be requested through the ECOS-IPaC system by completing the same process used to receive the enclosed list. If listed, proposed, or candidate species were identified as potentially occurring in the project area, coordination with our office is encouraged. Information on the steps involved with assessing potential impacts from projects can be found at: http://www.fws.gov/northeast/nyfo/es/section7.htm

Please be aware that bald and golden eagles are protected under the Bald and Golden Eagle Protection Act (16 U.S.C. 668 et seq.), and projects affecting these species may require development of an eagle conservation plan (http://www.fws.gov/windenergy/eagle_guidance.html). Additionally, wind energy projects should follow the Services wind
energy guidelines (http://www.fws.gov/windenergy) for minimizing impacts to migratory birds and bats.

Guidance for minimizing impacts to migratory birds for projects including communications towers (e.g., cellular, digital television, radio, and emergency broadcast) can be found at: http://www.fws.gov/migratorybirds/CurrentBirdIssues/Hazards/towers/towers.htm; http://www.towerkill.com; and http://www.fws.gov/migratorybirds/CurrentBirdIssues/Hazards/towers/comtow.html.

We appreciate your concern for threatened and endangered species. The Service encourages Federal agencies to include conservation of threatened and endangered species into their project planning to further the purposes of the ESA. Please include the Consultation Tracking Number in the header of this letter with any request for consultation or correspondence about your project that you submit to our office.

Endangered Species Act Species
There is a total of 2 threatened, endangered, or candidate species on this species list.

Species on this list should be considered in an effects analysis for your project and could include species that exist in another geographic area. For example, certain fish may appear on the species list because a project could affect downstream species.

IPaC does not display listed species or critical habitats under the sole jurisdiction of NOAA Fisheries\(^1\), as USFWS does not have the authority to speak on behalf of NOAA and the Department of Commerce.

See the "Critical habitats" section below for those critical habitats that lie wholly or partially within your project area under this office's jurisdiction. Please contact the designated FWS office if you have questions.

**Full Environmental Assessment Form**

**Part 2 - Identification of Potential Project Impacts**

Part 2 is to be completed by the lead agency. Part 2 is designed to help the lead agency inventory all potential resources that could be affected by a proposed project or action. We recognize that the lead agency's reviewer(s) will not necessarily be environmental professionals. So, the questions are designed to walk a reviewer through the assessment process by providing a series of questions that can be answered using the information found in Part 1. To further assist the lead agency in completing Part 2, the form identifies the most relevant questions in Part 1 that will provide the information needed to answer the Part 2 question. When Part 2 is completed, the lead agency will have identified the relevant environmental areas that may be impacted by the proposed activity.

If the lead agency is a state agency and the action is in any Coastal Area, complete the Coastal Assessment Form before proceeding with this assessment.

**Tips for completing Part 2:**
- Review all of the information provided in Part 1.
- Review any application, maps, supporting materials and the Full EAF Workbook.
- Answer each of the 18 questions in Part 2.
- If you answer "Yes" to a numbered question, please complete all the questions that follow in that section.
- If you answer "No" to a numbered question, move on to the next numbered question.
- Check appropriate column to indicate the anticipated size of the impact.
- Proposed projects that would exceed a numeric threshold contained in a question should result in the reviewing agency checking the box "Moderate to large impact may occur."
- The reviewer is not expected to be an expert in environmental analysis.
- If you are not sure or undecided about the size of an impact, it may help to review the sub-questions for the general question and consult the workbook.
- When answering a question consider all components of the proposed activity, that is, the "whole action".
- Consider the possibility for long-term and cumulative impacts as well as direct impacts.
- Answer the question in a reasonable manner considering the scale and context of the project.

Full Environmental Assessment Form

Part 3 - Evaluation of the Magnitude and Importance of Project Impacts and Determination of Significance

Part 3 provides the reasons in support of the determination of significance. The lead agency must complete Part 3 for every question in Part 2 where the impact has been identified as potentially moderate to large or where there is a need to explain why a particular element of the proposed action will not, or may, result in a significant adverse environmental impact.

Based on the analysis in Part 3, the lead agency must decide whether to require an environmental impact statement to further assess the proposed action or whether available information is sufficient for the lead agency to conclude that the proposed action will not have a significant adverse environmental impact. By completing the certification on the next page, the lead agency can complete its determination of significance.

Reasons Supporting This Determination:
To complete this section:
- Identify the impact based on the Part 2 responses and describe its magnitude. Magnitude considers factors such as severity, size or extent of an impact.
- Assess the importance of the impact. Importance relates to the geographic scope, duration, probability of the impact occurring, number of people affected by the impact and any additional environmental consequences if the impact were to occur.
- The assessment should take into consideration any design element or project changes.
- Repeat this process for each Part 2 question where the impact has been identified as potentially moderate to large or where there is a need to explain why a particular element of the proposed action will not, or may, result in a significant adverse environmental impact.
- Provide the reason(s) why the impact may, or will not, result in a significant adverse environmental impact.
- For Conditional Negative Declarations identify the specific condition(s) imposed that will modify the proposed action so that no significant adverse environmental impacts will result.
- Attach additional sheets, as needed.

The Planning Board, as the designated lead agency for the Action, under the provisions of Part 617 of the State Environmental Quality Review Regulations, has given a thorough and comprehensive evaluation of the impacts likely to result from the proposed Action. Based upon this evaluation, the Planning Board, in a separate resolution adopted on Wednesday, March 25, 2022 has determined the proposed Action will not likely result in a significant adverse impact upon the environment and that a Negative Declaration is issued.

Upon review of the information recorded on this EAF, as noted, plus this additional support information

EAF Supporting Information and project maps

and considering both the magnitude and importance of each identified potential impact, it is the conclusion of the Town of Pavilion Planning Board as lead agency that:

☑️ A. This project will result in no significant adverse impacts on the environment, and, therefore, an environmental impact statement need not be prepared. Accordingly, this negative declaration is issued.

☐ B. Although this project could have a significant adverse impact on the environment, that impact will be avoided or substantially mitigated because of the following conditions which will be required by the lead agency:

There will, therefore, be no significant adverse impacts from the project as conditioned, and, therefore, this conditioned negative declaration is issued. A conditioned negative declaration may be used only for UNLISTED actions (see 6 NYCRR 617.7(d)).

☐ C. This Project may result in one or more significant adverse impacts on the environment, and an environmental impact statement must be prepared to further assess the impact(s) and possible mitigation and to explore alternatives to avoid or reduce those impacts. Accordingly, this positive declaration is issued.

(A) By virtue of the Act, the Agency has been vested with all powers necessary and convenient to carry out and effectuate the purposes and provisions of the Act and to exercise all powers granted to it under the Act; and

(D) The action to be taken by the Agency will induce the Company to develop the Project, thereby increasing employment opportunities in Genesee County, New York, and otherwise furthering the purposes of the Agency as set forth in the Act; and

(E) The Project will not result in the removal of a facility or a commercial, industrial, or manufacturing plant of the Company or any other proposed occupant of the Project from one area of the State of New York (the "State") to another area of the State or result in the abandonment of one or more plants or facilities of the Company or any other proposed occupant of the Project located within the State; and the Agency hereby finds that, based on the Application, to the extent occupants are relocating from one plant or facility to another, the Project is reasonably necessary to discourage the Project occupants from removing such other
plant or facility to a location outside the State and/or is reasonably necessary to preserve the competitive position of the Project occupants in their respective industries.

Section 2. The Agency is hereby authorized to conduct a public hearing in compliance with the Act.

Section 3. The officers, employees and agents of the Agency are hereby authorized and directed for and in the name and on behalf of the Agency to do all acts and things required and to execute and deliver all such certificates, instruments and documents, to pay all such fees, charges and expenses and to do all such further acts and things as may be necessary or, in the opinion of the officer, employee or agent acting, desirable and proper to effect the purposes of the foregoing resolutions and to cause compliance by the Agency with all of the terms, covenants and provisions of the documents executed for and on behalf of the Agency.

Edwards Vacuum is planning on building a dry pump manufacturing facility and two-story office building at STAMP for Phase I of their semiconductor supply chain factory of the future.

The new facility will produce approximately 20,000 dry pumps by 2025 at current forecast levels. The project aims to reshape the vacuum pump manufacturing to STAMP to support the company's US customers and the ambition behind the federal CHIPS Act program.

The Phase I capital investment will be $212 million and plans to create 343 FTE's.

Edwards Vacuum is requesting assistance from the GCEDC with a sales tax exemption estimated at $4,344,000, and a property tax abatement estimated at $12,855,790 via a 20-year fixed 50% PILOT.

Economic Impact: The economic impacts (discounted value) on Local Benefits totals $644,100,763 ($628,707,932 in payroll and $15,392,831 to the public in tax revenues). For every $1 of public benefit the company is generating $39 into the local economy.

Section 3. The officers, employees and agents of the Agency are hereby authorized and directed for and in the name and on behalf of the Agency to do all acts and things required and to execute and deliver all such certificates, instruments and documents, to pay all such fees, charges and expenses and to do all such further acts and things as may be necessary or, in the opinion of the officer, employee or agent acting, desirable and proper to effect the purposes of the foregoing resolutions and to cause compliance by the Agency with all of the terms, covenants and provisions of the documents executed for and on behalf of the Agency.

IN WITNESS WHEREOF, I have hereunto set my hand and affixed the seal of said Agency this _____ day of ______________, 2023.

Secretary
RPNY Solar 7 Project

Discussion:

RPNY Solar 7 noticed an error from the previously approved application for Financial Assistance, located in the Town of Batavia, New York.

Their cover 8/16/22 letter and the project description in Section II.A of the application each indicate a project size of 2.5 MWac. The correct project size should be 1.6 MWac.

This was a clerical error and a QA/QC failure on their part when we filled out the application.

Please note that the error is restricted to the project description only. All of the economic information (project costs, project investment, funding, etc.) described throughout the application remain accurate and are reflective of a 1.6 MWac project.

They apologize for any confusion this error may have caused and they are appreciative of our understanding and assistance in rectifying this error before the project PILOT is closed.

Direction from Harris Beach:

Russ Gaenzle and Stephen Maier spoke with the applicant's counsel last week about this. Given this is a reduction in project scope, no need for a formal resolution. Simply having the board acknowledge will suffice.

3f. Shared services agreement with Erie County Industrial Development Agency

**Discussion:** The GCEDC has a shared services agreement with Erie County Industrial Development Agency (ECIDA) for on call IT support services. The GCEDC had this agreement since 2016 and has been very pleased with the service and response time to our issues. We would like to continue this agreement in 2023. The agreement is at an hourly rate of $95. They also provide website hosting services for the GCEDC ($600 annually), anti-virus software ($720 annually), CRM Hosting ($2,200 annually) and any version upgrade would be $500 each occurrence as required. There has been no increase in the hourly rate since 2016 and there was a $10 per hour increase from 2021 to 2022. There are no changes from 2022 to 2023. All other amounts have remained the same as last year.

The following amounts were included in the 2023 budget:
- Professional Services - $6,500 for ECIDA IT consultant (web hosting, anti-virus, hourly IT support)
- Dues & Subscriptions - $2,500 for ECIDA CRM Hosting

**Fund commitment:** Not to exceed $6,500 as included in the Professional Services, and $2,500 as included in Dues & Subscriptions line items of the 2023 budget.

**Committee action request:** Recommend approval of not to exceed $9,000 for on call IT support services, website hosting, anti-virus software, CRM hosting and upgrades with ECIDA for 2023.

STAMP Site visualization Services

Discussion: In conjunction with the March 2021 Letter of Resolution between NYSDEC, SHPO and the GCEDC, any project at STAMP that requires a discharge permit for stormwater from NYSDEC must complete an assessment of potential impacts to the Nation’s Territory. This proposal will be to prepare a visual assessment for the construction of the substation. This will include photo simulations along with line-of-sight profiles. This will also include the visual assessment for the GCEDC in connection with certain proposed and future infrastructure improvements and facilities at STAMP.

Fund Commitment: $4,750 from the $33 million.

Board Action Request: Approval of payment of $4,750 to Saratoga Associates for the visual assessment and profiles.

Re: Proposal Submission – Additional Project Visualization Services – GCEDC STAMP Site

Dear Mr. Fitzgerald:

Saratoga Associates is pleased submit this proposal to provide additional project visualization services for the Genesee County Economic Development Council (GCEDC) Science & Technology Advanced Manufacturing Park (STAMP) site. We understand the primary need is to depict the degree of potential visibility and general visual character of structures depicted on the “STAMP – Master Utility Plan – Onsite Infrastructure” (“Master Plan”), dated November 2022. We further understand that the primary emphasis of the assessment will be on views from the abutting Tonawanda Seneca Nation’s Territory (“Nation’s Territory”), with secondary emphasis on views from the Hamlet of Alabama and Routes 63 and 77.

PRIMARY SCOPE OF SERVICES

Project 1 – Visualization of Substation from Nation’s Territory

Saratoga Associates previously provided virtual visualizations of the proposed “112 Line” as viewed from the Nations Territory. To simulate the degree of visibility of structures envisioned in the Master Plan we would revise the previously prepared 3D model data and provided visualizations from the same vantage points. Visualizations would depict proposed buildings from three vantage points at four incremental vegetative setback distances; no setback, 50-foot setback, 100-foot setback and 200-foot set-back from the STAMP/Nation’s Territory property line.

Project 2 – Visualization from Hamlet of Alabama and Routes 63 and 77

Saratoga Associates will provide conceptual photo simulations illustrating the likely degree of visibility and general visual character of the proposed building two off-site vantage points to the northeast of the STAMP property.

Photo simulations will be prepared by superimposing a rendering of a three-dimensional computer model of proposed buildings into existing conditions photographs taken previously. This proposal does not contemplate need for additional site photography.
The 3D computer model of the Master Plan Structures will be developed in AutoDesk Civil 3D® and 3D Studio Max® software. The 3D model will be built to a conceptual level of detail commensurate with the best design information currently available for this project.

Simulated perspectives will be aligned with the corresponding base photograph by matching the precise X, Y, and Z coordinates of the field camera position (as recorded by GPS) and the focal length of the camera lens used. The camera’s target position will be established by aligning common elements visible in both the digital model and actual photograph (e.g., existing regional topography and/or structures within view). The 3D model will be rendered using sunlight settings approximating the date and time of day the base photograph was taken. To the extent practicable, design details (e.g., precise location, elevation, dimension, form and color) of the proposed facility will be built into the 3D model and incorporated into the photo simulation.

Simulations will be provided in PDF format. Page size will be 11”x17” format on a descriptive title block. One (1) draft will be submitted to the project sponsor for review prior to the final document.

For the purpose of this proposal, we assume up to three (3) simulated vantage points representative of views from the hamlet of Alabama and Routes 63 and 77 will be provided.

Task 3 – Summary Document - Saratoga Associates will provide a brief written report documenting the methodology used to develop project visualizations and summarizing potential project visibility from the adjacent property.
