III. PROJECT SUMMARY

The company is planning a community solar farm project in the town of Pembroke. The project is a 4MW AC solar generation system that will be interconnected with National Grid.

The project will provide enhanced property tax payments via a 15-year PILOT that are significantly greater than the current agricultural-vacant land value of the project. The project will contribute \$5,500/MWAC + a 2% annual escalator, with the 4 MW AC solar farm generating in excess of \$380,000 in PILOT payments

over the 15-year term. The project will also fund a community benefit agreement for workforce development and economic development projects in Genesee County.

The project is aligned with New York's aggressive goals for renewable energy, energy efficiency and greenhouse gas reductions, and offer customers a 10% discount vs average market rates for the generated power.

In addition to these benefits, the project is supporting the continued viability of the agricultural economy in Genesee County.

The GCEDC is seeking to assist the project with sales tax exemption of approximately \$274,000 and property tax exemption of approximately \$354,000.
