Re: Confirmation of County Water Availability – STAMP Site

Dear Mr. Masse,

This letter is provided at your request to confirm the availability of County water supply to the Science, Technology and Advanced Manufacturing Park (STAMP) site.

Pursuant to the Water Supply Agreement between the County of Genesee and the Genesee County Economic Development Center dated March 30, 2017, the County agreed to furnish or cause to be furnished water to the STAMP site at a rate of 200,000 gallons per day (gpd) under the terms and conditions set forth in that agreement.

Based on information provided to the County through the State Environmental Quality Review (SEQR) documentation associated with the Edwards Vacuum project, the anticipated water demand for that facility has been identified as up to approximately 30,000 gpd.

Accordingly, and based on that submitted information, the remaining capacity available within the 200,000 gpd supply referenced in the Water Supply Agreement is approximately 170,000 gpd for other users at the STAMP site.

This letter is intended solely to confirm the availability of water supply as contemplated in the existing agreement and based on currently available project information. Nothing contained herein shall be construed to modify or expand the terms of the March 30, 2017 Water Supply Agreement or to constitute a guarantee of water usage by any specific tenant.

Actual water service to individual users at the STAMP site remains subject to applicable agreements, system capacity, operational conditions, and regulatory requirements in effect at the time service is requested.

Please contact me if additional information is required.

Sincerely,

A handwritten signature in black ink that reads "Laura Wadhams PE". The signature is written in a cursive style with a loop at the end of the "s" in "Wadhams".

Laura A. Wadhams, P.E.

Commissioner

Genesee County Department of Public Works
