II. Project Information

A) Detailed Description of Project (including type, location and purpose of project):
The applicant currently owns and operates a 42 unit building of affordable and special needs housing located at 555 East Main Street, Batavia, New York. The project received assistance through GCEDC for its original construction in the form of a PILOT, as well as a sales tax abatement. Applicant is now proposing to construct an addition of 20 units of affordable housing to households with incomes below 50% of the area median income, which will bring the building to a total of 62 units. DePaul will offer supportive services for 10 frail seniors as well as 10 individuals with a mental health diagnosis. The addition will be comprised of two floors with a central elevator, which the existing building lacks. Laundry services and computer lounges will be available on each floor. Residents will have access to a community room with a kitchen. The cost of all utilities will be included in rent.
Applicant is seeking to amend the existing March 1, 2009 PILOT to account for an additional 20 units, at the per unit existing PILOT rate that is scheduled at the time the additional units are placed in service, which is estimated to commence as of the due date for the April 1, 2023 City PILOT bill. (i.e., the total annual PILOT payment would increase by approx. $7,000.00 for the additional 20 units).
The City Planning Board issued a negative declaration for the addition under SEQRA, and approved a Special Use Permit and Site Plan on June 16, 2020.
The applicant is projecting to start construction on the addition in July 2021 and being operational in January 2023.

The facility will be reshaped and slightly increased in footprint size. The main storm water management facility is approximately 4 acres in size.

19. Has the site of the proposed action or an adjoining property been the location of an active or closed solid waste management facility?
   If Yes, describe:

20. Has the site of the proposed action or an adjoining property been the subject of remediation (ongoing or completed) for hazardous waste?
   If Yes, describe:

Part 2 - Impact Assessment: The Lead Agency is responsible for the completion of Part 2. Answer all of the following questions in Part 2 using the information contained in Part 1 and other materials submitted by the project sponsor or otherwise available to the reviewer. When answering the questions the reviewer should be guided by the concept “Have my responses been reasonable considering the scale and context of the proposed action?”

1. Will the proposed action create a material conflict with an adopted land use plan or zoning regulations?

2. Will the proposed action result in a change in the use or intensity of use of land?

3. Will the proposed action impair the character or quality of the existing community?

4. Will the proposed action have an impact on the environmental characteristics that caused the establishment of a Critical Environmental Area (CEA)?

5. Will the proposed action result in an adverse change in the existing level of traffic or affect existing infrastructure for mass transit, biking or walkway?

6. Will the proposed action cause an increase in the use of energy and it fails to incorporate reasonably available energy conservation or renewable energy opportunities?

7. Will the proposed action impact existing:
   a. public/private water supplies?
   b. public/private wastewater treatment utilities?

8. Will the proposed action impair the character or quality of important historic, archaeological, architectural or aesthetic resources?

9. Will the proposed action result in an adverse change to natural resources (e.g., wetlands, waterbodies, groundwater, air quality, flora and fauna)?
10. Will the proposed action result in an increase in the potential for erosion, flooding or drainage problems?

**Part 3 - Determination of significance.** The Lead Agency is responsible for the completion of Part 3. For every question in Part 2 that was answered "moderate to large impact may occur", or if there is a need to explain why a particular element of the proposed action may or will not result in a significant adverse environmental impact, please complete Part 3. Part 3 should, in sufficient detail, identify the impact, including any measures or design elements that have been included by the project sponsor to avoid or reduce impacts. Part 3 should also explain how the lead agency determined that the impact may or will not be significant. Each potential impact should be assessed considering its setting, probability of occurring, duration, irreversibility, geographic scope and magnitude. Also consider the potential for short-term, long-term and cumulative impacts.

☐ Check this box if you have determined, based on the information and analysis above, and any supporting documentation, that the proposed action may result in one or more potentially large or significant adverse impacts and an environmental impact statement is required.

☐ Check this box if you have determined, based on the information and analysis above, and any supporting documentation, that the proposed action will not result in any significant adverse environmental impacts.
