Re: USACE
Western NY Science & Technology Advanced Manufacturing Plant (STAMP)
Wastewater Treatment Plant Project
Town of Alabama, Genesee County, NY
10PR01963

Dear Mr. Vandrei:

The Division for Historic Preservation of the Office of Parks, Recreation and Historic Preservation (OPRHP) has reviewed the cultural resource documents available to date that include archaeological survey reports and the "Cultural Resource Screening and Initial Assessment Western New York Science & Technology Manufacturing Park (STAMP) WASTEWATER TREATMENT FACILITY", prepared by kta preservation specialists (August 2021; Revised October 2021) in accordance with the New York State Historic Preservation Act of 1980 (SHPA).

Based on this review, it is the opinion of the OPRHP that no properties, including archaeological and/or historic resources, listed in or eligible for the New York State and National Registers of Historic Places will be adversely impacted by this project.

Traditional cultural properties, such as those located on the Tonawanda Nation's Territory, are often difficult to recognize, and their existence and significance are best defined by knowledgeable users of such areas. For future SHPA impact determinations at STAMP, special consideration should be given to a Traditional Cultural Property investigation or a National Register Evaluation of Eligibility document, if provided by the Tonawanda Seneca Nation.

If you have any questions, I can be reached at nancy.herter@parks.ny.gov.

Sincerely,

Nancy Herter
Director, Technical Preservation Services Bureau
